

Calcium Hardness Formula

Pool Volume = 95,000 gallons

Adjust the Calcium Hardness from 80 ppm to 300 ppm

Use Calcium Chloride (100%)

Amount of Chemical		Pool Volume		Change		Total
		95,000 gal		220 ppm		
		÷ 10,000 gal		÷ 10 ppm		
0.9 pounds	X	9.5	X	22	=	188.1 pounds
